

## TR TRAPEZOID PROFILE BUCKETS

### Maximize Ditching Efficiency with TR Trapezoid Profile Buckets

#### Key Features:

- **Optimized Trapezoid Profile:** The unique trapezoid design ensures clean trench walls and minimal spoil, reducing rework and material handling.
- **Superior Digging Performance:** TR buckets excel in challenging soils, delivering efficient excavation for deep ditches and channels.
- Available teeth systems: **CAT J series, BYG Futura, ESCO UltraLok**

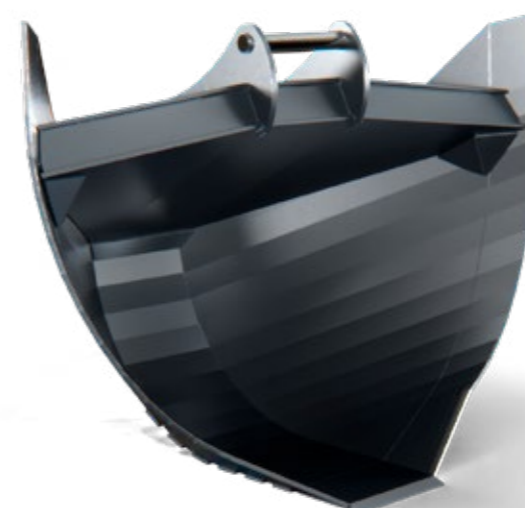

#### Benefits:

- **Clean Results:** Achieve precise ditch profiles with minimal soil disturbances, minimizing the need for additional finishing.
- **Reduced Downtime:** The efficient trapezoid design minimizes material handling and rework, leading to faster project completion.
- **Broad Applicability:** TR buckets are suitable for various ditching tasks, from drainage channels to utility installations.

Upgrade your excavator's capabilities with TR trapezoid profile buckets. Experience improved efficiency, cleaner results, and reduced downtime on your next ditching project.

## UB U-LINE BUCKET

### Achieve Consistent U-Shaped Trenches with U-Line Buckets

#### Key Features:

- **Unique U-Shaped Design:** Excavate trenches with a consistent U-profile, ideal for pipe laying, foundation work, and utility installations.
- **Improved Efficiency:** Minimize back-filling and handwork by creating the desired trench shape in a single pass.
- **Reduced Material Handling:** The U-Line Bucket's design optimizes material removal, reducing the need for excess excavation and disposal.
- Available teeth systems: **CAT J series, BYG Futura, ESCO UltraLok**

**U-Line Buckets** are a valuable addition to your excavator fleet, promoting accuracy, efficiency, and cost savings in projects requiring U-shaped trenches.

## VB V-LINE BUCKET

#### Key Features:

- **Customizable angles:** Tailor the bucket angle to meet your exact slope requirements, eliminating the need for multiple passes.
- **Efficient one-pass operation:** Minimize work time and maximize productivity by creating the desired slope in a single pass.
- Available teeth systems: **CAT J series, BYG Futura, ESCO UltraLok**

**V-Line Buckets:** Achieve precise ditching and slope creation in one efficient pass with customizable angles. Ideal for applications like drainage channels, swales, and road shoulders, V-Line Buckets ensure accurate results and boost productivity on your next excavation project.
